- Large diaphragm provides accuracy for precise control
- Multiple switching options meet the design of applications

APPLICATIONS

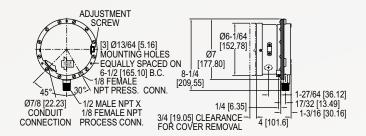

· Natural, manufactured or LP gas applications

DESCRIPTION

Large sensitive diaphragm and reliable, time proven mechanical design are combined in **Series PG Pressure/Differential Pressure Switches**. For use with air and other compatible gases, they feature excellent ±1% of full scale repeatability, clear, easy-to-read scale and convenient external set point adjustment. Application flexibility is assured by a large variety of switching options including SPST, SPDT, DPST, and DPDT; opening or closing on increasing pressure, vacuum or differential. Mercury switches or hermetically sealed snap switches are available where high humidity would be a problem. If vibration or other factors preclude the use of mercury, snap switched can be provided. Standard housing is NEMA 1. Optional enclosures can be supplied for weather resistant and explosion-proof requirements.
