## L SERIES SIDE ENTRY LEVEL SWITCH

## FEATURES

## APPLICATIONS

0 to 500V AC 15 Amp S.P.D.T switch

- Low Voltage Gold contact model also available
- 316 Stainless or Polypropylene models

A Available with 1" BSP or NPT thread
Manual override built in

- Modular construction

High pressure 400 Bar 5800 psi models available

- Seal-less magnetic drive
- Weatherproof IP67 housing
- Easily serviceable

## INTRODUCTION

The L Series side entry level switch provides a reliable accurate and low cost solution to tank level control. The switch is available in all thermoplastic construction or in a combination of 316 Stainless Steel and Polypropylene or CPE for Diesel applications. The level switch can be supplied with a 500 Volt rated single pole double throw microswitch for general control circuit use or with a 30 volt rated single pole double throw microswitch for low voltage low current applications. The L Series level switch is built tough to give a long reliable service life in the most arduous applications.

ORDERING

## ELECTRICAL DATA

The L Series Level Switch houses a S.P.D.T (Single Pole Double Throw) switch. The standard switch is suitable for all general control circuit applications up to 500 V AC. It is ideal for the control of pump starters, relay logic circuits, and for the direct control of contactors and timers.

## IMPORTANT

The standard H switch can operate at ANY voltage from 5 to 500 VAC . It can be used to directly control pump motors up to 375 Watts ( 0.5 HP ) at 240VAC. For larger motors always use an interposing contactor or relay between the flow switch and the motor.

## ELECTRICAL LIMITS FOR THE STANDARD H SWITCH

| Electrical Data |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| RATED VOLTAGE | NON INDUCTIVE LOADS |  |  |  | INDUCTIVE LOADS |  |  |  |
|  | $\begin{aligned} & \text { RESISTIVE } \\ & \text { LOAD } \end{aligned}$ |  | LAMP LOAD |  | INDUCTIVE LOAD |  | MOTOR LOAD |  |
|  | NO | NC | NO | NC | NO | NC | NO | NC |
| 125 VAC | 15A |  | 3A | 1.5A |  |  | 5A | 2.5A |
| 250 VAC | 15A |  | 2.5A | 1.25A |  |  | 3A | 1.5A |
| 500 VAC | 10A |  | 1.5A | 0.75A |  |  | 1.5A | 0.75 |
| 8 VDC | 15A |  | 3A | 1.5A |  |  | 5A | 2.5A |
| 14 VDC | 15A |  | 3A | 1.5A |  |  | 5A | 2.5A |
| 30 VDC | 6A |  | 3A | 1.5A |  |  | 5A | 2.5A |
| 125 VDC | 0.5A |  | 0.5A | 0.25A |  |  | 0.05A | 0.05A |
| 250 VDC | 0.5A |  | 0.5A | 0.25A |  |  | 0.03A | 0.03A |

In addition to the standard switch, a S.P.D.T. switch with gold contacts, designated "L" is also available for low voltage and low wetting current signalling applications.

## ELECTRICAL LIMITS FOR THE L SWITCH

| Maximum Switched Voltage | 30 VDC |
| :--- | :--- |
| Maximum Switched Current | 26 mA |
| Minimum Switched Voltage | 5 VDC |
| Minimum Switched Current | 1 mA |

OPERATING LIMITATIONS

| Parameter | L Series with <br> Polypropylene process <br> connection | L Series with <br> Stainless process <br> connection |
| :--- | :---: | :---: |
| Maximum operating <br> pressure (Static or <br> Dynamic) at ambient <br> temperature | 18 Bars <br> $(261 \mathrm{PSI})$ | 400 Bars <br> $(5800 \mathrm{PSI})$ |
| Minimum burst <br> pressure at ambient <br> temperature | 45 Bars <br> $(652 \mathrm{PSI})$ | 800 Bars <br> $(11800 \mathrm{PSI})$ |
| Maximum operating <br> temperature | $60^{\circ} \mathrm{C}$ <br> See note <br> below | $80^{\circ} \mathrm{C}\left(176^{\circ} \mathrm{F}\right)$ |
| Minimum operating <br> temperature | $-20^{\circ} \mathrm{C}\left(-4^{\circ} \mathrm{F}\right)$ | $-20^{\circ} \mathrm{C}\left(-4^{\circ} \mathrm{F}\right)$ |
| Ingress protection <br> rating | IP 67 | IP 67 |

Please note: Maximum operating pressure of the all Polypropylene L series switch must be linearly de-rated as operating temperature is increased so that at $60^{\circ} \mathrm{C}\left(140^{\circ} \mathrm{F}\right)$ the maximum permissible operating pressure for the switch does not exceed one $\operatorname{Bar}$ (15 psi) absolute.

The L Series Level Switches can be used in hazardous areas. The switch is classed as a simple device and does not contain components capable of storing or producing an electric charge. As a simple device It can be used in hazardous applications provided it is isolated by an intrinsically safe barrier, a zener barrier.

## APPROVED STANDARDS

The standard single pole double throw switch used in the L Series Level Switch is approved to the following international standards: UL (File No. E32667), CSA (File No. LR21642) SEV (File No. S20/163) and CE.
