FEMALE SEMIAUTOMATIC COUPLER

Series 05131102 Technical specifications

DOC: 0513SA_01_EN REV: 01-09/2017

The Silea Female Semi-automatic Coupler series 05131104 is designed to achieve a quick and dry coupling, without loss of product, between a Bottom Loading Arm or a hose and the Male Coupler on a tank truck. The difference with the manual type is that the Coupler hooks automatically to the male coupler before opening the flow.

The coupler respects the API RP 1004 Standards and can be used with all compliant couplers.

Technical features			
Nominal diameter/ Coupling		Flange 4" TTMA	
Fludi type		Hydrocarbons	
Design pressure		10 bar	
Working pressure		3-5 bar	
Test pressure		15 bar	
Max coupling pressure		6 bar	
Design temperature		-15°C / +65°C	
Nominal flow rate [flow speed: 4.5 m/s]	120 m³/h		2000 l/min
Max flow rate	150 m³/	'h	2500 l/min

The main component of the oupler are made in aluminium alloy. Standard seals in fluoroelastomer FKM-GLT (Viton® for -40°c/+200°c) are easy to maintain. The surfaces subject to wear are hard coated.

Standards and Regulations

- Conformity Declaration of current Directive **PED** for Pressure Equipment
- Conformity Declaration of current Directive ATEX for Equipment used in Potentially explosive atmospheres
- > Customs Declaration of certification for Russia, Kazakhstan, Belarus, EAC certification.
- Standard API-ASTM-ANSI-TTMA.
