

## with high power output for finishing cast iron and stone

The silicon carbide fibre discs of the special 4700 siaral 8 series ensure high stock removal rates in coarse to fine sanding applications and are ideal for a variety of applications involving hard to grind metals as well as stone.

### Advantages

- High removal rate
- Firm fibre backing
- Wide range of grits available for coarse to fine grinding

### Applications

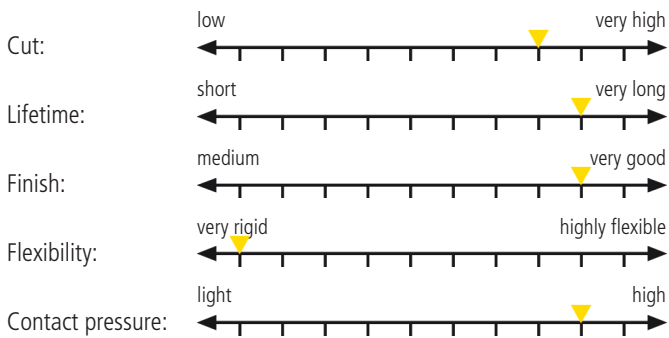

- Sanding down
- Surface treatment
- Smoothing and blending of flaws
- Deburring
- Structuring and final sanding

### Product profile

Grit type: Silicon carbide  
 Backing: Fibre  
 Coating: Closed  
 bonding: resin over resin

### Properties

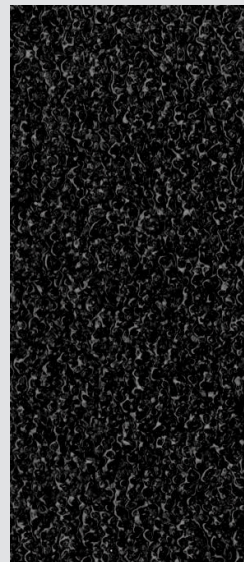

The following properties refer to the materials used in the main application:

### Materials

Other metals with poor chip removal properties
