A Novanta Company

- CW 532 nm up to 750 mW
- CW 660 nm up to 200 mW
- Extremely low noise
- TruLoQ ${ }^{\text {TM }}$ Active mode lock technology

## Overview

The torus is the only actively locked single longitudinal mode laser commercially available. The torus is available at $532 \mathrm{~nm}(50 \mathrm{~mW}$ to 750 mW$)$ and at $660 \mathrm{~nm}(50 \mathrm{~mW}$ to 200 mW$)$, making it ideal for applications such as holography, Brillouin scattering and high resolution Raman spectroscopy. The pump diode MTTF is manufacturer-specified as $>100,000$ hours at full power, but Laser Quantum de-rates the diode to further increase its lifetime, giving the torus itself industry leading lifetimes.

Despite the inherent single frequency operation of the torus, mode-drift and eventual mode-hop will occur if the laser cavity changes length due to ambient air temperature variation. To mitigate this, the digital power supply receives a signal from the laser which reports the exact position of the laser mode in frequency space. The power supply then feeds back a control signal which maintains the position of the mode. This active feedback control loop eliminates the risk of mode-hop and leads to a highly stable output. (Fig. 1 and 2).

Fig. 1 Typical wavelength stability versus head temperature of torus laser.

Using a Fabry-Perot interferometer (JRS Scientific Instruments) the torus laser typically shows high spectral purity with side bands $<-110 \mathrm{~dB}$ compared with the central mode. (Fig. 3)*.

See Laser Quantum whitepaper "torus spectral purity" for further information.

* Measured by a customer and does not represent a Laser Quantum specification.

Fig. 2 Typical wavelength stability versus time of torus laser.

Fig. 3

Using TruLoQ ${ }^{\text {TM }}$ technology, the effects of temperature change on the laser such as mode-drift and mode-hop are minimised.

The torus can be controlled across the internet via the RemoteApp ${ }^{T M}$ software that also allows connection to the Laser Quantum support team for monitoring laser performance, diagnosing opportunities for and carrying out laser optimisation.

Every torus laser has been subjected to a 1200 g drop-test to check that all components are correctly fitted prior to its extended 300 hour test period. This rigorous testing regime ensures long operational lifetimes.

A Novanta Company

## Other information

- Umbilical length: 1.5 m
- Laser head weight: 1.2 kg
- Warm-up time: <30 minutes
- Cooling options available
- Horizontal polarisation on request
- Fibre coupling available
- LabView drivers available
- 2 years unlimited hours warranty for scientific users

Drawings are for illustrative purposes only, please contact Laser Quantum for complete engineer's drawings.

## Specifications*

|  | torus 532 | torus 660 |
| :--- | :---: | :---: |
| Wavelength | 532 nm | 660 nm |
| Power | 50 to 750 mW | 50 to 200 mW |
| Beam diameter ${ }^{1}$ | $1.7 \mathrm{~mm} \pm 0.2 \mathrm{~mm}$ | $1.7 \mathrm{~mm} \pm 0.2 \mathrm{~mm}$ |
| Spatial Mode | $\mathrm{TEM00}$ | TEM00 |
| Ellipticity | $<1: 1.1$ | $<1: 1.1$ |
| Bandwidth | 1 MHz | 1 MHz |
| Divergence | $\leq 0.45 \mathrm{mrad}$ | $\leq 0.55 \mathrm{mrad}$ |
| M-Squared | $<1.1$ | $<1.1$ |
| Power stability (RMS ${ }^{2}$ | $<1.00 \%$ | $<1.00 \%$ |
| Noise (RMS) | $<0.25 \%$ | $<0.50 \%$ |
| Noise bandwidth | 10 Hz to 100 MHz | 10 Hz to 50 kHz |
| Pointing stability | $<2 \mathrm{urad} /{ }^{\circ} \mathrm{C}$ | $<2 \mathrm{urad} /{ }^{\circ} \mathrm{C}$ |
| Polarisation ratio | $>100: 1$ | $>100: 1$ |
| Polarisation direction ${ }^{3}$ | vertical | vertical |
| Coherence length | $>100 \mathrm{~m}$ | $>100 \mathrm{~m}$ |
| Beam angle ${ }^{4}$ | $<1 \mathrm{mrad}$ | $<1 \mathrm{mrad}$ |
| Operating temperature | 15 to $35{ }^{\circ} \mathrm{C}$ | 15 to $35{ }^{\circ} \mathrm{C}$ |

* Laser Quantum operates a continuous improvement programme which can result in specifications being improved without notice. ${ }^{1}$ Beam diameter defined as the average of major and minor $1 / \mathrm{e}^{2}$ beam size measured at 25 cm from exit port, at specified power.
${ }^{2}$ Test duration $>100 \mathrm{hrs}$ at constant temperature.
${ }^{3}$ Horizontal poalrisation is available upon request.
${ }^{4}$ Tolerance relative to head orientation.
