## Description

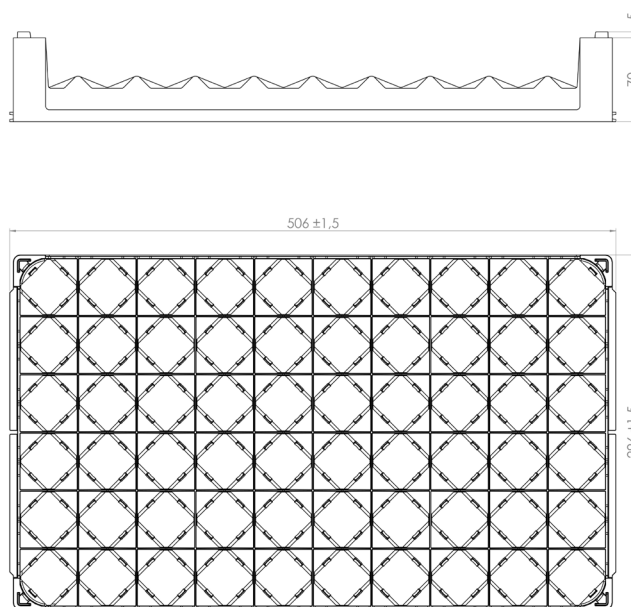

The B14297 is Petersime's compact, stackable setter tray, designed for manual egg collecting at the farm and subsequent loading on setter trolleys. It has 60 egg places arranged in a 10 x 6 matrix. The trays are compatible with Petersime BioStreamer™, AirStreamerPlus™ and Conventional setters as well as with automation equipment.

The special shape of the tray ensures an adequate air flow around the entire surface of the egg shell. The egg supports

are designed for ideal positioning of both small and large eggs.

The tray is made of polypropylene and painted black to ensure minimum reflection of light, which enables efficient candling. It is designed for intensive handling and for cleaning by industrial washing machines.
