## Capacitive Discharge Welders

The CD-A is the latest and most advanced capacitive discharge welder that is automation-ready and features dual pulse output with control and monitoring of both pulses.

- Built-in current monitor
- Four pulse widths with fast rise times
- Automatic polarity switching  
CD-A125A/300A only

### KEY FEATURES

- Dual pulse function helps overcome surface inconsistencies
- Built-in monitor measures peak current for both pulses for process monitoring
- Process monitor features a color coded bar graph on the RUN screen that provides instant weld history of In Limit/ Out of Limit percentages to assess process performance
- Upper and lower limits can be set for both pulses, with an option to inhibit Pulse 2 if Pulse 1 is out of limits. Prevents weld blow out
- Upslope function allows gradual ramping of weld energy to alleviate weld splash CD-A125A/300A only
- Automatic polarity switching between pulses provides even heating between electrodes and increases electrode life CD-A125A/300A only
- Up to four software selectable pulse widths increases the range of welding applications and improves process optimization
- Efficient power electronics provide high repetition rates

### TYPICAL APPLICATIONS

*Battery tab welding*

*Tack welding of carrier strip*

*Conductive terminal attachment*

**RUN screen**

**LIMITS/ COUNTER screen**

**SETUP screen**

**RUN screen** contains all information at a glance, with color coding. When Out of Limits occurs, box turns from green to red. Weld counter shows In Limits/Out of Limits percentage.

**LIMITS/ COUNTER screen.** Set limit settings with second pulse inhibit option if Out of Limit condition occurs on Pulse 1. Reset weld counter and set counter limit.

**SETUP screen.** Upslope, chaining and language select.
