

Overview

The AudioCodes **Mediant™ 5G-EA** is an Extension Access device that connects to any MSBR router to enable 5G WAN connectivity, transforming the customer branch router to all-in-one 5G router combining multi-WAN access, data, voice and security in a single device. It is an ideal product for network service providers looking to offer 5G connectivity to small businesses and branch offices.

Designed specifically to meet the increasing data needs of SOHOs and SMBs, the Mediant 5G-EA enhances the customer connectivity experience with highest throughput over 5G due to its outdoor IP65 capabilities, and best reception location thanks to 100m Ethernet cable connection to the router

5G Cellular | Outdoor IP65 | Internal Antennas | 1Gbps Performance

Integrated 5G modem supporting up to 1Gbps

Outdoor device for optimal reception

Compatible with any AudioCodes MSBR Mediant device

Support 5G NSA and SA modes

Networking Interfaces	
Cellular	Sub-6 GHz bands, 5G CAT 20 Modem with fallback to 4G/3G
LAN	1 port 10/100/1000Base-TX
Chipset	QUALCOMM
5G modes	support SA and NSA modes
Bands	5G bands n1/n3/n5/n7/n8/n20/n28/n38/n40/n41/n77/n78/n79 4G bands B1/B3/B5/B7/B8/B20/B28/B32
Performance	SA: 1 Gbps (DL)/ 900 Mbps (UL) NSA: 1 Gbps (DL)/ 650 Mbps (UL) LTE: 1 Gbps (DL)/ 200 Mbps (UL)
SIM	Dual SIM cards for redundant operation
Antennas	6 Internal omnidirectional Antennas
Management	Managed through any MSBR Mediant device
Installation	Indoor or Outdoor (IP65)
Mounting	Wall and Pole mount
Power	External PS 12V 3A Optional POE injector
Environmental	Working temperature -40 °C - 55 °C Humidity 5% to 95% Protected from low pressure water jets should avoid direct sun and rain
