

# Power Grip & Power Grip PO Clutches

## Vision Statement

Our vision is to be the leader in every market we serve, to the benefit of our customers and our shareholders.

## Mission Statement

Profitable growth through superior customer service, innovation, quality and commitment to customer satisfaction.

## Core Values

1. We respect each other, our community and the environment.
2. We are ethical and honest in all of our business dealings.
3. We are diligent in protecting the safety of our people.
4. We are disciplined and personally accountable for our decisions, actions attitude and results.
5. We have an entrepreneur's mindset, driving innovation and striving for excellence in all we do.
6. We openly communicate among all levels of the company.
7. We believe in working as a team toward common objectives with a can-do attitude.

WPT Power is constantly striving to improve and develop the product range. For this reason, WPT Power reserves the right to make changes in any product information without prior notice. Every effort has been made to ensure that the dimensions, performance, specifications, etc. are correct at the time of printing. For more information, please contact your authorized WPT Power distributor or visit: [WPTpower.com](http://WPTpower.com).

# Power Grip PO Clutch

The WPT Power Grip PO Clutch is a pneumatic clutch suitable for inline or shaft-to-shaft applications. This design utilizes a large diaphragm that compensates for wear during the life of the friction material, no adjustment necessary. WPT's Power Grip PO Clutch is available in 1, 2, or 3 plate construction with diameters ranging from 14" thru 42".

- Large diaphragm provides high torque capacity and minimizes release drag
- Oversized release springs ensure quick, positive mechanical plate separation

# Power Grip Clutches

The Power Grip Clutch is designed to accommodate in-line and shaft-to-shaft power transmission applications with large inertia loads. Our air-tube design allows seamless, controlled engagement and disengagement with minimal air volume. Power Grip clutches allow for quick response, space-saving footprints, minimal maintenance requirements and are available in sizes ranging from 8" to 60".

- Extended Hub Teeth for serviceability
- Wave Springs as standard release spring
- Optional standard or quick change driving adapters
- Optional split airtubes and friction discs for easier replacement and minimal downtime
- Available with pneumatic or hydraulic actuation

# Power Grip Driving Adapters

## Standard Driving Adapters

Our standard adapter enables the clutch to work in a shaft-to-shaft or coupling package.

## Quick Change Driving Adapters

This quick change arrangement starts with a driving elbow flange positioned between the Power Grip drive ring and Quick Change Driving Adapter. It allows service on the clutch (wear parts) without removing or disturbing either shaft.

# Power Grip High Speed Clutches

Power Grip High Speed Clutches are designed to withstand severe applications mounted to internal combustion engines. The drive rings will fit standard SAE industrial flywheels. Heavy duty gear teeth friction discs are designed to withstand high shock loads. WPT's Power Grip High Speed clutches are well suited for bell housing gear box clutch applications.

## Pneumatic Clutches

Model	Maximum Input Torque*	Maximum Speed	Lining Area
	lbf-ft (N·m)	r/min	in <sup>2</sup> (cm <sup>2</sup> )
111	650 (881)	2500	110 (730)

Consult WPT Application Engineering for application assistance and applicable service factors.

Larger bore sizes may be accommodated, consult WPT Application Engineering.

Dynamic torque is 75% of static torque.

\*For Drive Ring Dimensions see chart on page 3

## Extended Tooth Hub

A major innovation for the Power Grip Clutch is WPT's extended tooth hub which simplifies assembly of the clutch while mounted in a horizontal position. The extended teeth allow for all center/floating plates to remain at rest on the hub teeth with the release springs in a relaxed state. No special tools are required to retain all parts on the hub while the airtube holding plate and bolts are installed.

**Power Grip Clutch with Coil Springs**

**Power Grip Clutch with Wave Springs**

## Wave Release Springs

Another service innovation for the Power Grip Clutch is the use of wave springs. Only one wave spring is required per plate in contrast to aligning several coil springs. The wave spring allows for ease of assembly while the clutch is mounted in a horizontal position. It eliminates the use of special tools to retain the coil springs.

## Speed Ratings of Wave Springs

Clutch Size	Maximum Speed
	r/min
14" / 14H	1140
16"	1040
18" / 18H	940
21"	890
24" / 24H / 24SHD	750
27"	720
30" / 30H	690
36"	480

# Power Grip Grinding Mill Clutches

## Grinding Mill Clutches

Power Grip Grinding Mill Clutches are the best heavy duty option for ball, pebble, rod, AG and SAG grinding mill applications. High inertia loads are brought on line quickly and smoothly where controlled starts are required. WPT's Power Grip clutches are designed to use a minimal amount of air volume.

- Reduces power demand for high inertia load starts
- Disc design has more torque capacity and lining area than drum style products
- Suitable for jogging and inching

Grinding Mill Selection Guide is for reference only. For full warranty consideration, a data sheet must be turned into WPT Power and complete review performed by WPT Power Applications Engineering.

# Power Grip Accessories

## Quick Release Valves

WPT quick release valves are utilized to provide fast exhaust of air pressure from the clutch. Mounted directly to the airtube spuds, these QRVs provide a large exhaust port directly at clutch or brake. Mufflers are optional for quieter operation.

## Rotating Unions

The WPT rotating union is engineered to allow air or fluid passage, under pressure, to the end of a rotating shaft. This is a maintenance free design that protects against leakage.

Clutch Size	Air Union Part Number	A	B	Rotor Thread	Inlet Thread
		in (mm)	in (mm)		
108 thru 318H	W00-21-006	2 9/16 (66.5)	1 5/8 (41.3)	5/8"-18 UNF	1/4" NPT
	W00-21-001	3 3/8 (85.7)	1 11/16 (43.7)	5/8"-18 UNF	3/8" NPT
121 thru 336	W00-21-002	3 11/16 (95.2)	2 3/16 (56.7)	1"-14 UNS	1/2" NPT/BSPT
	W00-21-008	4 1/4 (109.5)	2 13/16 (72.9)	1"-14 UNS	3/4" NPT
342 thru 460	W00-21-011	5 1/16 (128.5)	3 1/4 (82.6)	1 1/2"-12UNF	1" NPT

Larger capacity rotating air unions for faster response time available.

## Typical Hose Arrangements for Power Grip Clutches

### Global resource network

Our qualified distributor network provides responsive and knowledgeable sales and technical support worldwide. WPT's customer care approach ensures your product needs will be met quickly and with minimum downtime – when and wherever you are.
