# 1. Introduction

## 1.1. The Logical Solution

Process and machine monitoring, safety, security and surveillance applications often require that remote cameras be positioned far from their controlling computers. Long distance image transmission, security and resolution are top priorities in these and many other environments. That's why we've developed the *Thinklogical*® Camera Fiber-Link Extension System with the Camera-Link® standard for high performance digital cameras and frame grabbers.

## 1.2. The Camera Fiber-Link System

The Camera Fiber-Link System uses a Camera Side Unit and a Frame Grabber Side Unit that are connected by duplex, multi-mode fiber optic cables, allowing Camera Link video support up to 350 meters (1150 feet) from the host computer with no loss of signal or resolution and without the use of amplifiers or repeaters of any kind. With industrial enhancements such as a threaded screw-lock input for standard 5V-12V input power, or for our 12V-24V input power, designed for rugged industrial environments, the Camera Fiber-Link System is ideal for any application.

### Conventions Used In This Manual

As you read this manual you will notice certain conventions that bring your attention to important information. These are **Notes** and **Warnings**. Examples are shown below.

**Note:** Important Notes appear in blue text preceded by a yellow exclamation point symbol, like this.

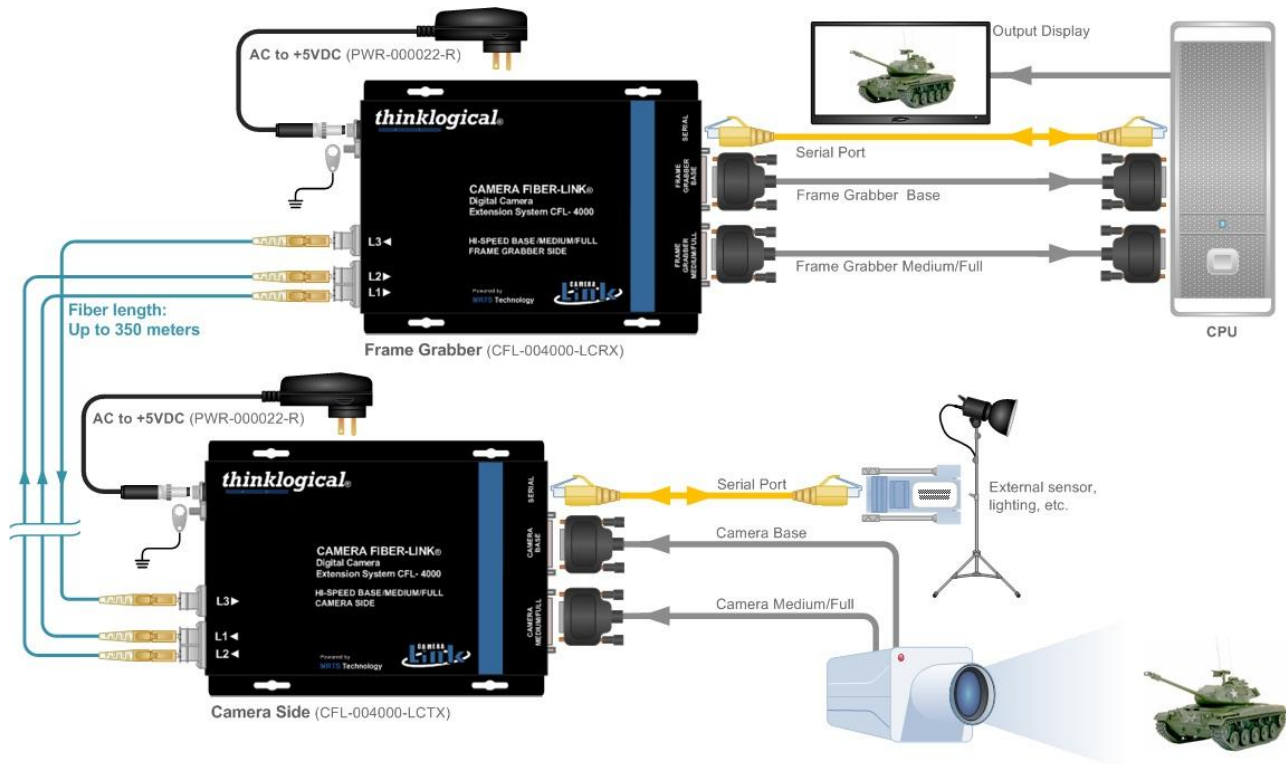

A note is meant to call the reader's attention to helpful information at a point in the text that is relevant to the subject being discussed.

**Warning!** Warnings appear in red text, followed by blue text, and preceded by a red stop sign, like this.

A warning is meant to call the reader's attention to critical information at a point in the text that is relevant to the subject being discussed.

**BEFORE STARTING ANY PROCEDURE, IT IS RECOMMENDED THAT YOU READ THE INSTRUCTIONS THOROUGHLY!**

**CABLING:** 50/125 um or 62.5/125 um, LC, SC or ST-type connector  
**CBL-000001-002M (CAT5)**  
**CBL-000007-002M (MDR-26 M to M)**  
**PWR-000022-R (AC to DC Converter-Standard +5VDC)**

**Figure 1:** Thinklogical® Camera Fiber-Link-4000 Cabling Application Drawing

The Camera Fiber-Link System from *Thinklogical®* allows the placement of a digital camera up to 350 meters (1150 feet) from the controlling computer without loss of resolution. Traditional copper cables are typically limited to 10 meters (32.81 feet) or less in such applications.

Each Base or Medium/Full Camera Fiber-Link System includes a transmitter and receiver chassis connected by multi-mode fiber optic cables at ports L1 and L2.\* The Medium/Full System requires a third, multi-mode fiber optic cable at port L3. **The Frame Grabber unit connects directly to the computer and the Camera unit connects directly to the digital camera**, each with a 2 meter Camera Link MDR-26 male-to-male cable (both included).

**Note:** 350 meters (1150 feet) is the standard maximum distance for a continuous 50/125, 1000 MHz-km fiber. See Appendix D (pg. 34) for the maximum allowable distances of other fiber types.

\*The multi-mode fibers used with the CFL-4000 must be of equal length.

## 1.2.1. Thinklogical® Camera Fiber-Link Models

Part Number	Description
<b>CFL-3000</b>	
CFL-000S03-SCRX	Camera Fiberlink 3000, Frame Grabber, Single Mode, SC/APC
CFL-000S03-SCTX	Camera Fiberlink 3000, Camera, Single Mode, SC/APC
VOP-S05	Camera Fiberlink 3000 Optics Option for TX or RX, Single Mode, Dual Fiber, 40km
CFL-000M03-LCRX	Camera Fiberlink 3000, Base Frame Grabber Side, Multi-Mode, LC
CFL-000M03-LCTX	Camera Fiberlink 3000, Base Camera Side, Multi-Mode, LC
CFL-000M03-SCRX	Camera Fiberlink 3000, Base Frame Grabber Side, Multi-Mode, SC
CFL-000M03-SCTX	Camera Fiberlink 3000, Base Camera Side, Multi-Mode, SC
CFL-000M03-STRX	Camera Fiberlink 3000, Base Frame Grabber Side, Multi-Mode, ST
CFL-000M03-STTX	Camera Fiberlink 3000, Base Camera Side, Multi-Mode, ST
VOP-M04	Camera Fiberlink 3000 Optics Option for TX or RX, Multi-Mode, Dual Fiber, 50M, 350M or 1000M, LC
VOP-M01	Camera Fiberlink 3000 Optics Option for TX or RX, Multi-Mode, Dual Fiber, 50M, 350M or 1000M, SC or ST
<b>CFL-4000</b>	
CFL-000S04-SCRX	Camera Fiberlink 4000, Full Frame Grabber, Single Mode, SC/APC
CFL-000S04-SCTX	Camera Fiberlink 4000, Full Frame Grabber, Single Mode, SC/APC
VOP-S05	Camera Fiberlink 4000 Optics Option for TX or RX, Single Mode, 3 Fibers, 40km
CFL-000M04-LCRX	Camera Fiberlink 4000, Full Frame Grabber Side, Multi-Mode, LC
CFL-000M04-LCTX	Camera Fiberlink 4000, Full Camera Side, Multi-Mode, LC
CFL-000M04-SCRX	Camera Fiberlink 4000, Full Frame Grabber Side, Multi-Mode, SC
CFL-000M04-SCTX	Camera Fiberlink 4000, Full Camera Side, Multi-Mode, SC
CFL-000M04-STRX	Camera Fiberlink 4000, Full Frame Grabber Side, Multi-Mode, ST
CFL-000M04-STTX	Camera Fiberlink 4000, Full Camera Side, Multi-Mode, ST
VOP-M05	Camera Fiberlink 4000 Optics Option for TX or RX, Multi-Mode, 3 Fibers, 50M, 350M or 1000M, LC
VOP-M02	Camera Fiberlink 4000 Optics Option for TX or RX, Multi-Mode, 3 Fibers, 50M, 350M or 1000M, SC or ST
<b>CFL-5000</b>	
CFL-000S05-SCRX	Camera Fiberlink 5000, Industrial Frame Grabber, Single Mode, SC/APC
CFL-000S05-SCTX	Camera Fiberlink 5000, Industrial Frame Grabber, Single Mode, SC/APC
VOP-S08	Camera Fiberlink 4000 Optics Option for RX, Single Mode, 3 Fibers, 40km
CFL-000M05-LCRX	Camera Fiberlink 5000, Industrial Dual Base Frame Grabber Side, Multi-Mode, LC
CFL-000M05-LCTX	Camera Fiberlink 5000, Industrial Dual Base Camera Side, Multi-Mode, LC
CFL-000M05-SCRX	Camera Fiberlink 5000, Industrial Dual Base Frame Grabber Side, Multi-Mode, SC
CFL-000M05-SCTX	Camera Fiberlink 5000, Industrial Dual Base Camera Side, Multi-Mode, SC
CFL-000M05-STRX	Camera Fiberlink 5000, Industrial Dual Base Frame Grabber Side, Multi-Mode, ST
CFL-000M05-STTX	Camera Fiberlink 5000, Industrial Dual Base Camera Side, Multi-Mode, ST
VOP-M05	Camera Fiberlink 5000 Optics Option for TX or RX, Multi-Mode, 3 Fibers, 50M, 350M or 1000M, LC
VOP-M02	Camera Fiberlink 5000 Optics Option for TX or RX, Multi-Mode, 3 Fibers, 50M, 350M or 1000M, SC or ST

<b>CFL-6000</b>	
<b>CFL-000S06-SCRX</b>	Camera Fiberlink 6000, High Speed Dual Base Frame Grabber, Single Mode, SC/APC
<b>VOP-S15</b>	Camera Fiberlink 4000 Optics Option for TX or RX, Single Mode, 4 Fibers, 40km
<b>CFL-000M06-LCRX</b>	Camera Fiberlink 6000, High Speed Dual Base Frame Grabber Side, Multi-Mode, LC
<b>CFL-000M06-SCRX</b>	Camera Fiberlink 5000, High Speed Dual Base Frame Grabber Side, Multi-Mode, SC
<b>CFL-000M06-STRX</b>	Camera Fiberlink 5000, High Speed Dual Base Frame Grabber Side, Multi-Mode, ST
<b>VOP-S17</b>	Camera Fiberlink 6000 Optics Option for TX or RX, Multi-Mode, 4 Fibers, 50M, 350M or 1000M, LC
<b>VOP-S16</b>	Camera Fiberlink 6000 Optics Option for TX or RX, Multi-Mode, 4 Fibers, 50M, 350M or 1000M, SC or ST

**Table 1:** Available Models

To complement its line of Camera Fiber-Link extenders, *Thinklogical*® also offers high performance **USB 2.0** and **Firewire 800** Camera Extenders. To contact a *Thinklogical*® sales representative for details, see the “How to Contact Us” section of this manual (pg. 22).

### 1.2.2. Increased Security

*Thinklogical's*® Camera Fiber-Link Systems are designed for high-resolution camera extension applications. The ability to position the cameras far from the CPU allows better control and security for your source equipment, which is especially important in applications where the cameras must be located in harsh, industrial or non-secured environments.

#### Remote Mounting

Each Camera Fiber-Link module can be used as a desk top or wall-mounted device. Mounting centers are provided with keyhole slots.

*(For vertical wall-mounting, it is recommended that you orient the unit with the fiber cables and power connector at the top and MDR-26 and RJ45 connectors at the bottom.)*

A mounting template is provided in **Appendix D** (pg. 34) for your convenience.

### 1.2.3. Class 1 LASERs

The Camera Fiber-Link system is designed and identified as a **Class 1 LASER** product.

***CLASS 1 LASERS do not require any special precautions under conditions of normal use.***

## 2. Product Features

### 2.1 System Features

Each Camera Fiber-Link System includes the following features:

- Supports all Camera-Link base (to full) configurations with pixel clocks 20-85 MHz
- Supports 1 dual-base or 2 individual-base cameras (CFL-5000 and CFL-6000)
- Fiber Count: CFL-3000 – 2 fibers  
CFL-4000 – 3 fibers  
CFL-5000 – 3 fibers  
CFL-6000 – 4 fibers
- Extend camera signals up to 350 meters (1150 feet) using standard multi-mode fiber
- Transparent Camera-Link® operation
- Compact design: Units are self-contained and do not require user adjustments  
HOUSING DIMENSIONS: 8.875" long x 5.44" wide x 1.19" high  
(225.425 mm x 138.13 mm x 30.16 mm high)
- Signal transmission via fiber optic cable – no RF interference
- Serial Port (RJ45) with RS-232 Interface
- Class 1 laser product
- Screw lock (threaded) power connector
- Chassis ground post
- Compatible with user's own DC input
- Customer supplied power 5V-12V

#### Power Enhancement Kit (optional)

- Customer supplied power 12V-24V

#### Industrial Enhancement Kit (optional)

- DIN rail connectors for mounting

#### Indicator LEDs

- The **Green LED** near the power connector is lit when **appropriate power is connected** to the power in port.
- The **Red LED is lit solid** (near the camera link connectors) when there is a **loss of signal** on the fiber.
- The **Red LED blinks** if the fiber is **installed properly but there is no clock** from the camera present.
- The **Red LED is OFF** when the unit is **receiving appropriate signals**.

## 2.2. Hardware Features

### 2.2.1. CFL-3000

The **CFL-3000 Extender** supports camera signals and serial connections (both the SerTFG and SerTC within the MDR cable, and three pairs of RS-232 lines). The CFL-3000 supports Base configurations and requires two fibers. Each unit is housed in a compact, metal enclosure (7.00" x 5.44" x 1.19"). The CFL-3000 is available with SC-, ST- or LC-type fiber optic connectors.

**Figure 2:** CFL-3000 Camera Side (CFL-000M03-SCTX) and Frame Grabber Side (CFL-000M03-SCRX)

### 2.2.2. CFL-4000

The **CFL-4000 Extender** supports camera signals and serial connections (both the SerTFG and SerTC within the MDR cable, and three pairs of RS-232 lines). The CFL-4000 supports Full/Medium/Base configurations and requires three fibers. Each unit is housed in a compact, metal chassis (7.00" x 5.44" x 1.19"). The CFL-4000 is available with SC-, ST- or LC-type fiber optic connectors.

**Figure 3:** CFL-4000 Camera Side (CFL-000M04-SCTX) and Frame Grabber Side (CFL-000M04-SCRX)

### 2.2.3 CFL-5000

The **CFL-5000 Extender** supports camera signals and serial connections (both the SerTFG and SerTC within the MDR cable, and three pairs of RS-232 lines). The CFL-5000 supports one or two base Camera-Link cameras or one dual-base Camera-Link camera configurations. Each unit is housed in a compact, metal enclosure (7.00" x 5.44" x 1.19"). The CFL-5000 is available with SC- (standard), ST- or LC-type fiber optic connectors.

**Figure 4:** CFL-5000 Camera Side (CFL-000M05-SCTX) and Frame Grabber Side (CFL-000M05-SCRX)

Each CFL-5000 configuration requires three fibers. The Camera Side Unit receives data from each camera and converts the data into optical signals. These signals are sent to the CFL-5000 Frame Grabber Side Unit, which in turn converts the optical signals into video data and sends them to the one dual-base frame grabber (CPU).

## 2.2.4. CFL-6000

The **CFL-6000 Dual Camera Fiber-Link Receiver** is a unique component designed for users who have two cameras in different locations and where space is a concern. The Dual CFL-6000 Frame Grabber receives optical data from two CFL-3000 Camera Side transmitters (over two optical fibers each) and converts them back into video data to send out to a frame grabber base (CPU). Each unit is housed in a compact, metal enclosure (7.00" x 5.44" x 1.19"). The CFL-6000 is available with SC- (standard), ST- or LC-type fiber optic connectors.

**Figure 5:** CFL-6000 Frame Grabber Side (CFL-000M06-SCRX)

## 2.2.5. Power Enhancement Kit (Optional)

The entire line of *Thinklogical®* Camera Fiber-Link Extenders features industrial enhancements, including a screw lock (threaded) input-power connector designed to meet the needs of a rugged industrial environment. The CFL-5000 and CFL-6000 models are available with input power ranges of 5-12V (standard) or 12-24V (industrial). Users can also choose to use their own DC input. A chassis ground post is included.

## 2.2.6 DIN Rails (Optional)

Each unit features DIN rail connectors for easy mounting, making it is possible to position your cameras in any setting while keeping the computer in a secure location. (A mounting template is included in *Appendix D*, pg. 34 for your convenience.)

## 2.3. Technical Specifications

Each *Thinklogical*® Camera Fiber-Link System is designed to the following specifications:

<p><b>Electrical Cable (supplied with system)</b></p>	<p><b>CFL-3000:</b> (1) CBL000007-002MR MDR-26 male cable, 2 meters (1) KIT-000013 CAMERALINK W/RJ45 adapter/cable kit</p> <p><b>CFL-4000:</b> (2) CBL000007-002MR MDR-26 male CABLE, 2 meters (1) KIT-000013 CAMERALINK W/RJ45 adapter/cable kit</p> <p><b>CFL-5000:</b> (2) CBL000007-002MR MDR-26 male CABLE, 2 meters (1) KIT-000013 CAMERALINK W/RJ45 adapter/cable kit</p> <p><b>CFL-6000:</b> (2) CBL000007-002MR MDR-26 male CABLE, 2 meters (1) KIT-000013 CAMERALINK W/RJ45 adapter/cable kit</p> <p><b>KIT-000013</b> contains the following: (1) ADP-000007 DB9M TO RJ45F Adapter (1) ADP-000008 DB9F TO RJ45F Adapter (2) CBL000001-002MR CAT5 cable assembly, 2 meters</p> <p>For Adapter Pin-outs, see Appendix B, pg. 32.</p>
<p><b>Serial</b></p>	<p><b>RJ45</b> (DB9M to RJ45 and DB9F to RJ45 adapters included)</p>
<p><b>Protocol</b></p>	<p><b>Camera Link compliant</b> (supports base/medium/full configurations)</p>
<p><b>Indicators</b></p>	<p>Two LEDs on each Camera Fiber-Link module:  <b>Loss of Signal [LOS]</b> (<b>Red ON</b> if no signal)  (<b>Red BLINKS</b> if no camera is connected)  (<b>Red OFF</b> for good connection)  <b>Power</b> (<b>Green ON</b> when power is applied)</p>
<p><b>Optical Cable</b></p>	<p><b>Fiber Count:</b>  CFL-3000 (Base): <b>2</b>  CFL-4000 (Full/Medium/Base): <b>3</b>  CFL-5000 (Dual Base): <b>3</b>  CFL-6000 (Dual Base RX): <b>4</b></p> <p><b>Fiber Type:</b> Multi-mode, 50/125um or 62.5/125um SC-type connectors  <b>Fiber Connector Type:</b> SC Standard / ST or LC Optional  <b>Maximum Fiber Distance:</b> See Appendix C, pg. 33</p> <p>(Fiber Cable is either customer-supplied or ordered from Thinklogical)</p>

<b>LASER Output</b>	850 nanometers
<b>Operating Temp and Humidity</b>	0 to 50°C (32 to 122°F), 5 to 95% RH, non-condensing
<b>Pixel Clock</b>	20 to 85 MHz
<b>Bit Assignments</b>	CFL-3000/CFL-5000/CFL-6000: Supports Base Configurations CFL-4000: Supports Full/Medium/Base Configurations
<b>Camera/Frame Grabber Connector</b>	CFL-3000: Camera Side -- (1) MDR-26 (supports Base only) Frame Grabber Side -- (1) MDR-26 (supports Base only) CFL-4000: Camera Side -- (2) MDR-26 (supports Full/Medium/Base) Frame Grabber Side -- (2) MDR-26 (supports Full/Medium/Base) CFL-5000: Camera Side -- (2) MDR-26 (supports Base only) Frame Grabber Side -- (2) MDR-26 (supports Base only) CFL-6000: Camera Side 1-- (1) MDR-26 (supports Base only) Camera Side 2 -- (1) MDR-26 (supports Base only) Frame Grabber Side -- (2) MDR-26 (supports Base only)
<b>Dimensions</b>	CFL-3000, CFL-4000, CFL-5000 and CFL-6000: <b>7.0" x 5.44" x 1.19"</b> (177.80 x 138.13mm x 30.23mm)
<b>Weights</b>	<b>Weight:</b> 1 lb. per unit <b>Shipping Weight:</b> 6 lbs.

<b>Warranty</b>	<b>12 months</b> from date of purchase. Extended warranties available at time of purchase.

**Table 2:** Technical Specifications

## 3. Connecting the Camera Fiber-Link

### 3.1 Types of Connections

#### 3.1.1. Fiber Cable

Either two (Base version) or three (Medium/Full version) **fiber optic cables will connect the Frame Grabber Unit** (near the CPU) **and the Camera Side Unit** (near the camera). The standard simplex and/or duplex, **multi-mode fiber** cables must be 50 or 62.5 micron, terminated with an SC-, ST- or LC-type connector and no longer than 1150 running feet (350 meters). A **single-mode fiber** version is also available that can extend up to 40 kilometers.

Be careful to not kink or pinch the fiber cable as it is being installed and keep all bend radii to no less than 3 inches (76.2mm). Be sure to dress the cable to prevent it from being crushed, pinched or otherwise damaged.

**BEFORE STARTING ANY PROCEDURE, IT IS RECOMMENDED THAT YOU READ THE INSTRUCTIONS THOROUGHLY!**

**Note:** For CFL- 4000 and CFL- 5000 Units it is necessary that the multi-mode fiber on L1 and L2 to be of equal length.

**Note:** The Camera Fiber-Link is available with SC-, ST- or LC-type fiber connectors upon request.

**Note:** 350 meters (1150 feet) is the standard maximum distance for a continuous fiber type of 50/125, 1000MHz-km. See *Appendix D* (pg. 34) for maximum distances of other fiber types.

#### 3.1.2. Digital Video Camera Side

The Camera Side unit connects to your video camera using a supplied MDR-26 male-to-male cable (CBL-000007-002M). The Base version includes one cable and the Medium/Full version includes two.

#### 3.1.3. Digital Video Frame Grabber Side

The Frame Grabber Side unit connects to your controlling computer's Frame Grabber with a supplied MDR-26 male-to-male cable (CBL-000007-002M). The Base version includes one cable and the Medium/Full version includes two.

#### 3.1.4. Serial Port

Both the Camera Side unit and the Frame Grabber Side unit have a serial port (RJ45 connector). This RS-232 interface connects to any external sensor, external lighting, etc., using

the supplied CAT5 Cable Assembly (CBL-000001-002M). A DB9M to RJ45F and a DB9F to RJ45F adapter is included with KIT-000033 (Fig. 6, pg. 13).

The serial port on the CFL-6000 varies from the CFL-3000, CFL-4000, and CFL-5000 systems in that serial data from the PC is broadcast to both Camera Side units (transmitters). However, **serial data to the PC only comes from Camera 1 on the Camera Side** (transmitter 1).

- Serial Port communications are sampled at approximately **32 MHz** going from the Camera to Frame Grabber (RX, DSR, CTS)
- Serial Port communications are sampled at **97 MHz** going from the Frame grabber to the Camera (RTS, TX, DTX).

The pin-outs for the Serial Port (RJ45 connector) are as follows:

**Figure 6:** Diagram showing the serial connections used as data terminal connections and the included DB9 to RJ45 adapters. Other uses are also possible using each signal to control a function at the camera end, such as lighting, sensors, etc.

### 3.1.5. Camera Control

Communications from the **Camera to the Frame Grabber**, SerTFG—Differential pair with serial communications to the frame grabber, are sampled at 97 MHz.

Communications from the **Frame Grabber to the Camera**, SerTC—Differential pair with serial communications to the camera, are Sampled at 97 MHz.

**Camera Controls 1-4** (CC1, CC2, CC3 and CC4) are sampled at 97 MHz.

## 3.2. AC Power

### 3.2.1. Standard Version: 5V-12V

Separate wall-pack AC-to-DC converters (Part Number PWR-000022-R) are included. A power jack is provided on both units and accepts the +5VDC input. The green power LED will light when the unit is receiving power.

The AC wall pack has a universal power rating (100-240 VAC, 50-60 Hz) and comes with slip-on, interchangeable adapters for various AC power receptacles found throughout the world. Use the appropriate AC power wall plug adapter for your country/location.

**Figure 7:** A 5V–12V Power Supply is provided with each Camera Fiber-Link unit. Each comes with three international AC power wall plug adapters.

### 3.2.2 Industrial Version: 12V-24V

For the Industrial Power Input Option, separate desktop AC-to-DC converters (Part Number PWR-000033-R) are included. A power jack is provided on both units and accepts the +12VDC input. The green power LED will light when the unit is receiving power.

The AC desktop power pack has a universal power rating (90-264 VAC, 47-63 Hz) and is also supplied with a country-specific, industry standard AC Power Cord.

A separate **+5V** (CON-000120-R) or **+12V** (CON-000119-R) **threaded screw-lock connector** is available for customers who prefer to use their own power source.

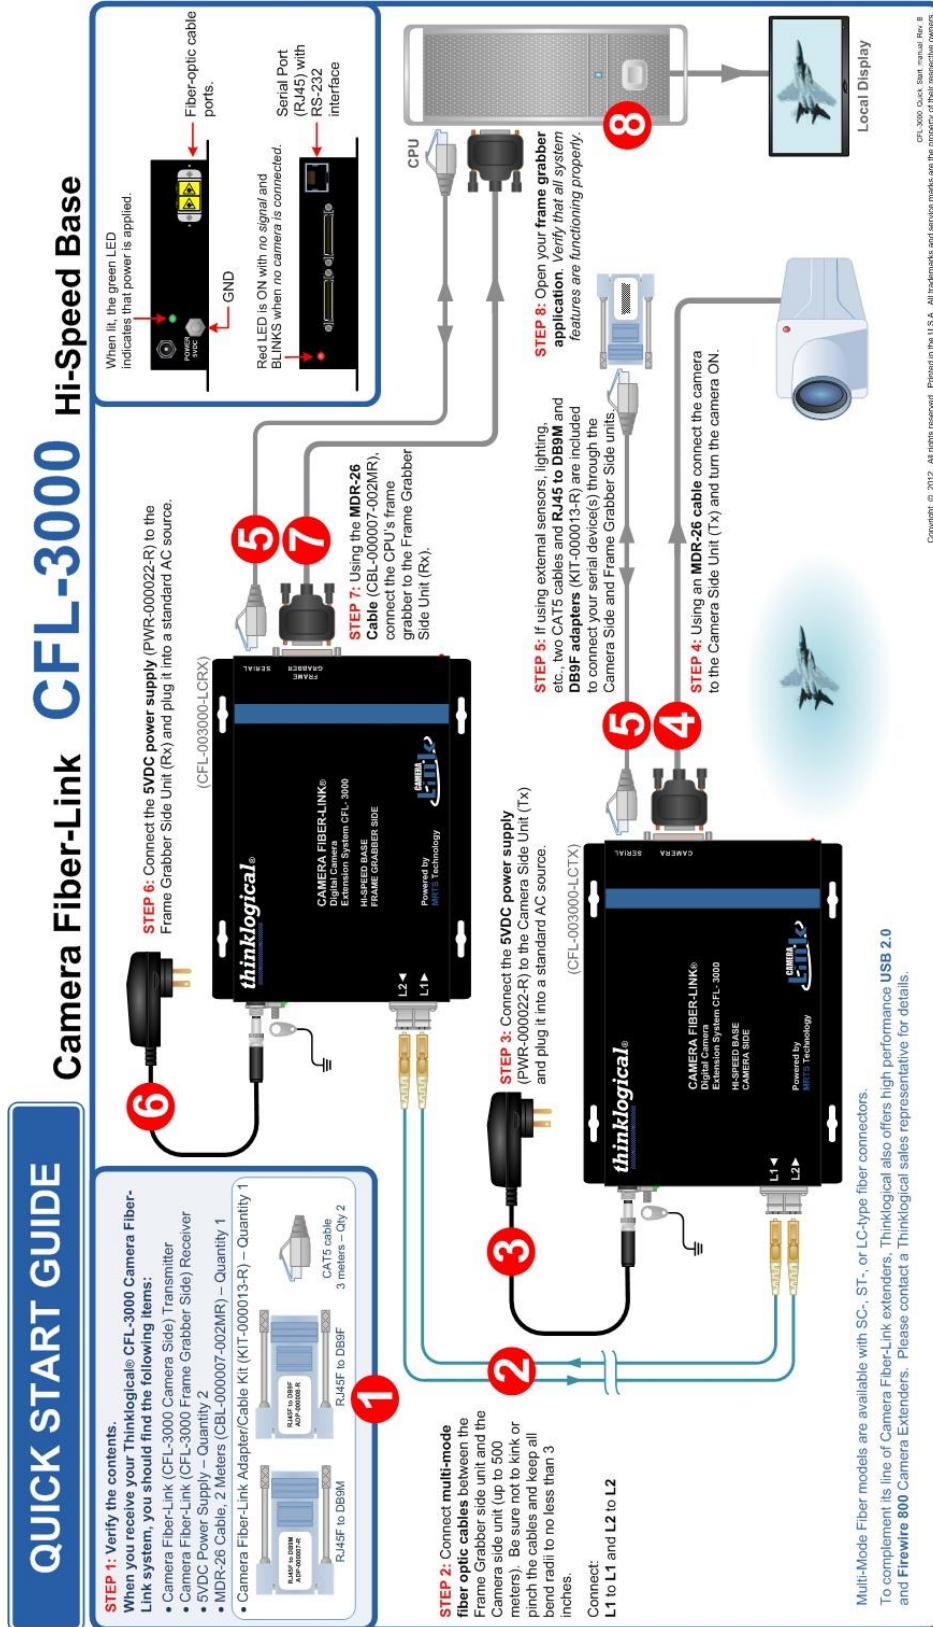

**Figure 8:** Two 12V–24V Desktop Power Supplies are provided with each Industrial Version Camera Fiber-Link System.

## 4. Order of Installation Events

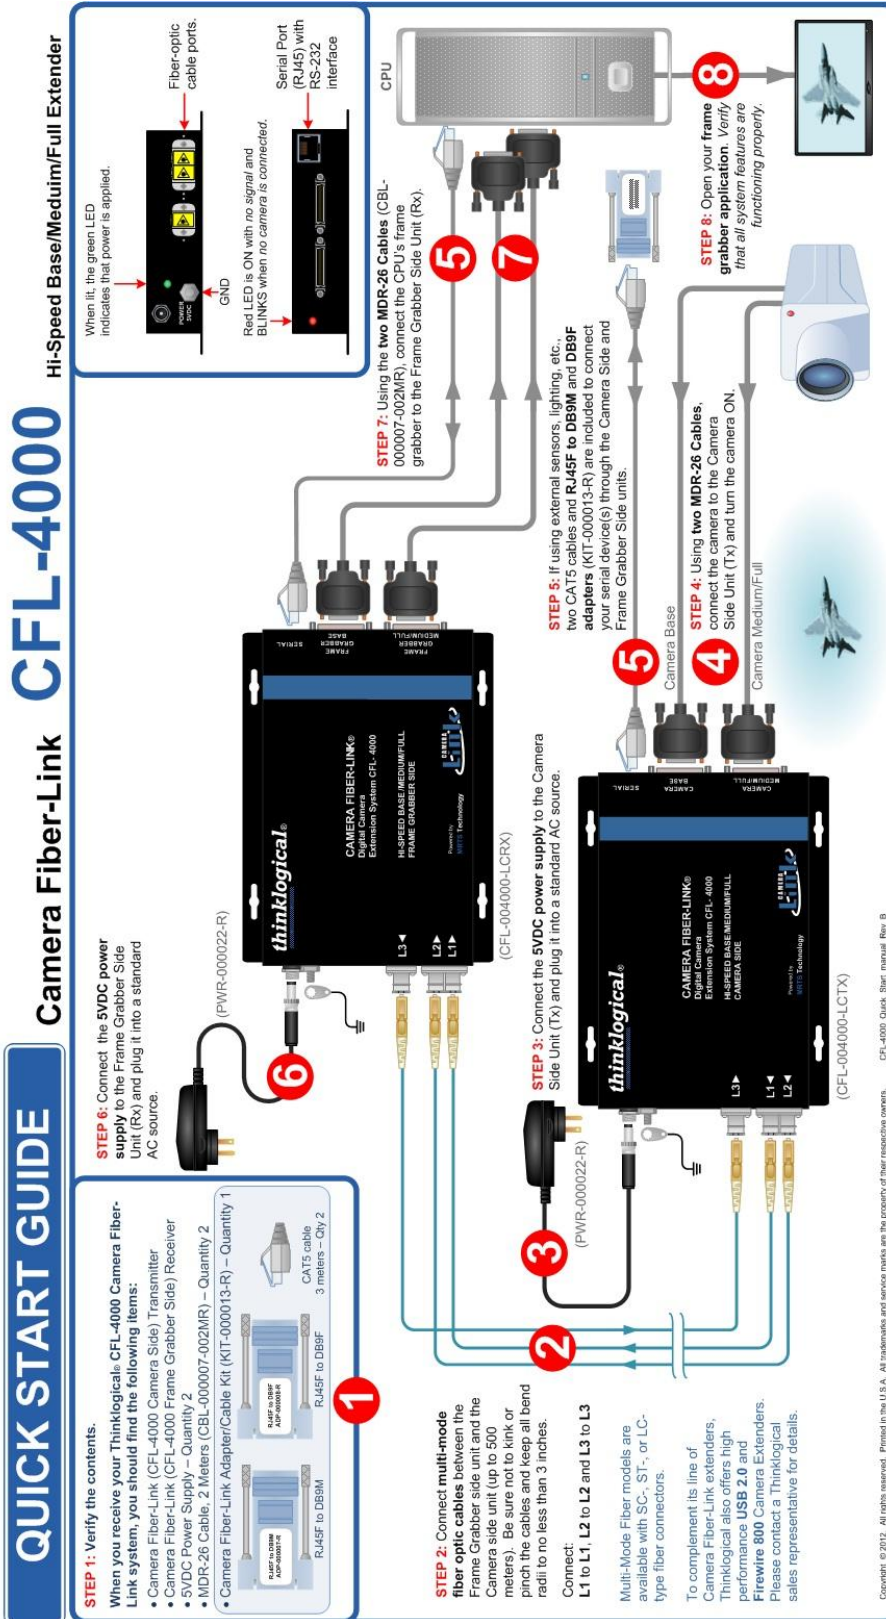

The following pages contain Quick Start Guides for each of the four CFL models available from *Thinklogical*®. Each guide contains specific information about the contents of your Camera Fiber-Link System, as well as order of installation events and detailed connection instructions.

**BEFORE STARTING ANY PROCEDURE, IT IS RECOMMENDED THAT YOU READ THE INSTRUCTIONS THOROUGHLY!**

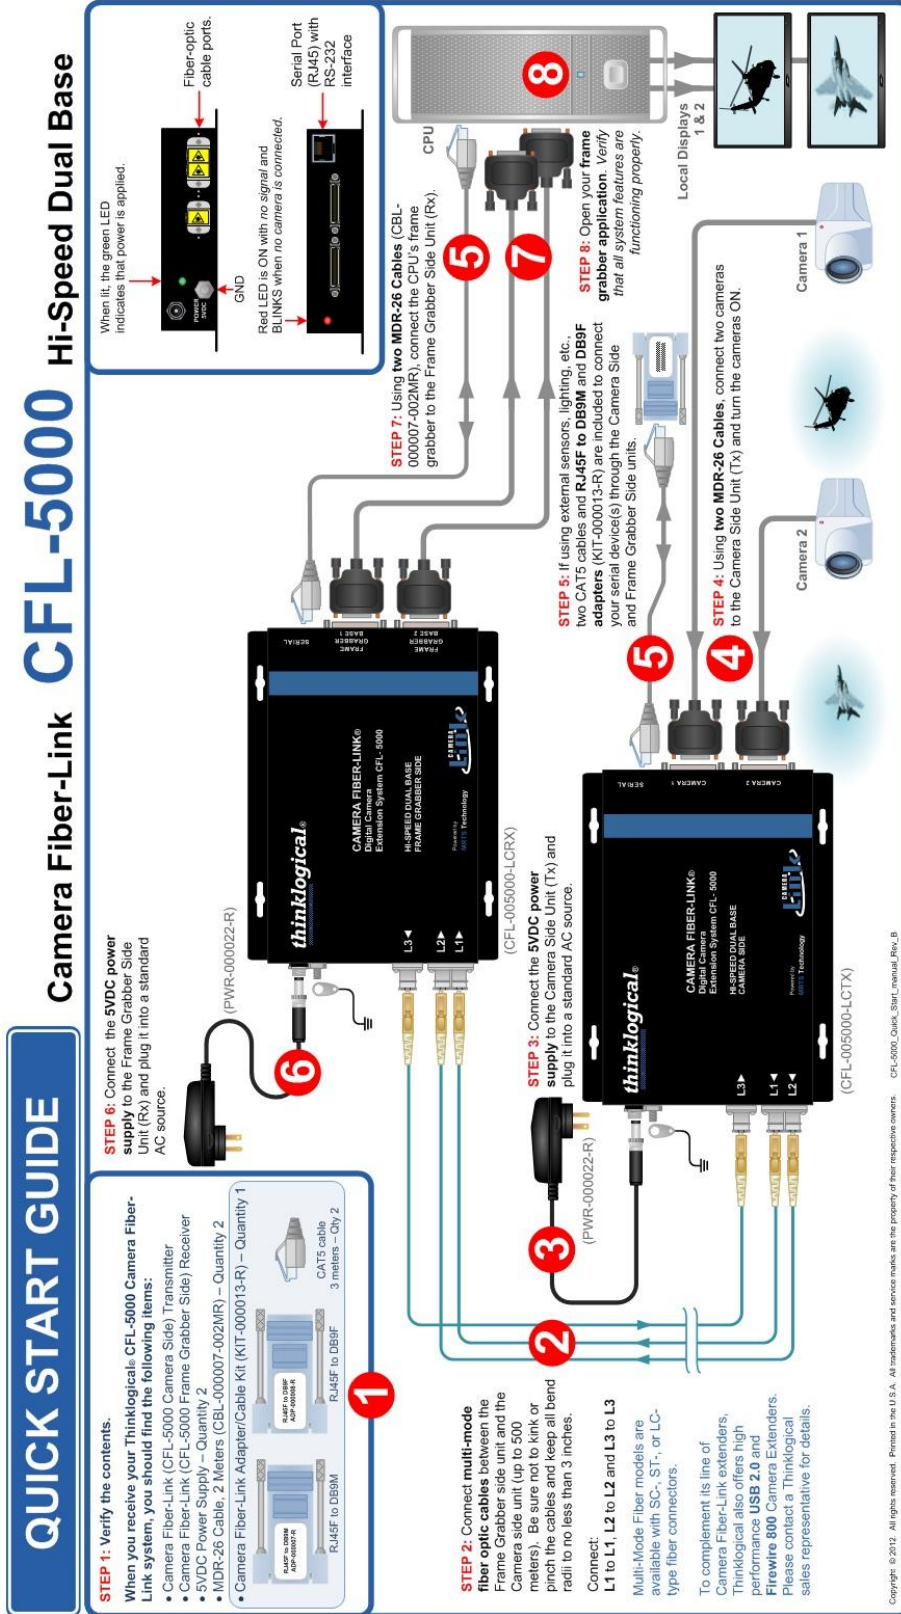

### 4.1. CFL-3000 (Figure 9)

## 5. Regulatory & Safety Compliance

### 5.1. Safety Requirements

#### 5.1.1. Symbols Found On Our Products

Markings and labels on our products follow industry-standard conventions. Regulatory markings found on the products comply with accepted industry requirements.

#### 5.1.2. Product Serial Number

Camera Fiber-Link products have a unique serial number printed on a label on the bottom of the chassis. The serial number includes a manufacturer's date-code. The format for the date-code is 2-digits each for the month, the day and the year, and two or three digits for a unique unit number. This serial number is also found on the original shipping carton.

#### 5.1.3. Connection to the Product

Connections and installation hardware for all of our products use industry-standard devices and methods wherever possible. All wiring connections to the customers' equipment are designed to minimize proprietary or customized connectors or cabling. Power connections are made with regionally appropriate power cords and approved methods.

### 5.2 Regulatory Compliance

*Thinklogical*® Camera Fiber-Link products are designed and made in the U.S.A. Camera Fiber-Link products have been tested by a nationally recognized testing laboratory and found to be compliant with the following standards (both domestic USA and many international locations).

**Warning! This is a Class 1 product. In a domestic environment this product may cause radio interference, in which case the user may be required to take corrective measures.**

#### 5.2.1. North America

These products comply with the following standards:

<b>Safety</b>	UL60950:2000 CAN/CSA C22.2 No. 60950-00
<b>LASER Safety</b>	CDRH 21CFR 1040.10 Class 1 LASER Product
<b>Electromagnetic Interference</b>	FCC CFR47, Part 15, Class 1 Industry Canada ICES-003 Issue 2, Revision 1

#### 5.2.2. Australia & New Zealand

This is a Class 1 product. In a domestic environment this product may cause radio interference, in which case the user may be required to take corrective measures.

### 5.2.3. European Union

#### 5.2.3.1. Declaration of Conformity

Manufacturer's Name & Address: **Thinklogical, LLC®**  
**100 Washington Street**  
**Milford, Connecticut 06460 USA**  
**Telephone (203) 647-8700**

**Product Name:**

*Camera Fiber-Link Video Extension System*

These products comply with the requirements of the Low Voltage Directive 72/23/EEC and the EMC Directive 89/336/EEC.

#### 5.2.3.2. Standards with Which Our Products Comply

**Safety**

- IEC60950:1992+A1, A2, A3, A4, A11

**LASER Safety**

- IEC60825:2001 Parts 1 and 2
- Class 1 LASER Product

**Electromagnetic Emissions**

- EN55022: 1994 (IEC/CSP1R22: 1993)
- EN61000-3-2/A14: 2000
- EN61000-3-3: 1994

**Electromagnetic Immunity**

- EN55024: 1998 Information Technology Equipment-Immunity Characteristics
- EN61000-4-2: 1995 Electro-Static Discharge Test
- EN61000-4-3: 1996 Radiated Immunity Field Test
- EN61000-4-4: 1995 Electrical Fast Transient Test
- EN61000-4-5: 1995 Power Supply Surge Test
- EN61000-4-6: 1996 Conducted Immunity Test
- EN61000-4-8: 1993 Magnetic Field Test
- EN61000-4-11: 1994 Voltage Dips & Interrupts Test

### 5.3. Supplementary Information

The following statements may be appropriate for certain geographical regions and might not apply to your location.

**Note:** This equipment has been tested and found to comply with the limits for a Class 1 digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is

operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area may cause harmful interference in which case the user may be required to correct the interference.

**Note:** This Class 1 digital apparatus complies with Canadian ICES-003 and has been verified as compliant within the Class 1 limits of the FCC Radio Frequency Device Rules (FCC Title 47, Part 15, Subpart B CLASS 1), measured to CISPR 22: 1993 limits and methods of measurement of Radio Disturbance Characteristics of Information Technology Equipment.

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

## 6. How to Contact Us

### 6.1. Customer Support

**Thank you for choosing Thinklogical<sup>®</sup> products for your application.**

*We appreciate your business and are dedicated to helping you successfully use our products.*

***thinklogical<sup>®</sup> is always here to help you.***

*To contact us, please use the following telephone numbers and internet-based methods:*

**Thinklogical<sup>®</sup>** is an engineering company and you will receive any assistance you may require directly from our most knowledgeable engineers. We believe that the first line of support is the design engineer that developed a particular product, and therefore, your questions will be handled promptly by our in-house engineers who are most familiar with your products.

#### 6.1.1. Website

Check out our website for current product offerings, support information and general information about all of the products we offer.

Our internet website offers product information on all current systems, including technical specification sheets and installation guides (for viewing online or for download), product diagrams showing physical connections and other helpful information.

Internet: **[www.thinklogical.com](http://www.thinklogical.com)**

**Note:** Most online documents are stored as Adobe Acrobat “PDF” files. If you do not have the Adobe Acrobat reader needed to view PDF files, visit [www.adobe.com](http://www.adobe.com) for a download.

### 6.1.2. Email

*Thinklogical*® is staffed **Monday through Friday from 8:30am to 5:00pm**, Eastern Time Zone. We will do our best to respond to your email inquiries promptly. Please use the following email addresses for your specific needs:

- **info@thinklogical.com** – Information about *Thinklogical*® and our products.
- **sales@thinklogical.com** – Sales Department - Orders, questions or issues.
- **support@thinklogical.com** – Product support, technical issues/questions, product repairs and request for Return Merchandise Authorization.

### 6.1.3. Telephone

- **Sales:** Contact our expert sales staff in Milford, CT at **1-203-647-8700** or in the continental US, use our **toll-free number: 1-800-291-3211**. We are here Monday through Friday from 8:30am to 5:00pm, Eastern Time Zone. Ask for your representative’s direct-dial phone number when you call.
- **Product Support:** Contact our Product Support Staff in Milford, CT at **1-203-647-8700**. The support lines are manned Monday through Friday, 8:30am to 5:00pm, Eastern Time Zone.
- **International Sales:** Contact our US sales staff in Milford, CT at **1-203-647-8700**. We are here Monday through Friday, 8:30am to 5:00pm, Eastern Time Zone (same as New York City). If leaving a voice message, please let us know the best time to call back so we may reach you at your convenience.

Our switchboard attendant will direct your call during regular business hours. We have an automated attendant answering our main telephone switchboard after regular business hours and holidays. You can leave a voice message for an individual at any time. All of our sales representatives have direct phone numbers for your convenience.

### 6.1.4. Fax

Our company facsimile number is **1-203-783-9949**. Please indicate the nature of the fax on your cover sheet and provide return contact information.

## 6.2. Product Support

**Thinklogical's**<sup>®</sup> support personnel are available Monday through Friday from 8:30am to 5:00pm, Eastern Time Zone. If your application requires assistance at some time outside of our normal business hours, please contact us beforehand, if possible, and we will do our best to accommodate your schedule.

### 6.2.1. Limited Warranty Information

Thinklogical, LLC<sup>®</sup> ("Thinklogical") warrants this product against defects in materials and workmanship for a period of one (1) year from the date of delivery (ordinary wear and tear excluded). This limited warranty does not cover defects resulting from (i) use of the product other than as described in the applicable documentation for the product; (ii) modifications to or repairs of the product that are made by any party other than Thinklogical or a party acting on Thinklogical's behalf, or (iii) combination of the product with third party products that is not consented to by Thinklogical. Occurrences of events described in (i) – (iii) shall void the foregoing warranty. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

**Except for the express warranty set forth above, to the fullest extent permitted under applicable law, Thinklogical, LLC<sup>®</sup> and its suppliers disclaim any and all other warranties, express and implied, including without limitation the implied warranties of merchantability, fitness for a particular purpose, title and non-infringement.**

If the defective product is returned to the authorized dealer within one (1) year of the delivery date, repair or replacement of the product will be made. Repairs may be made with refurbished parts. If repair or replacement is not possible, Thinklogical may keep the defective product and refund the amount that you paid for the defective product. These are Thinklogical's sole obligations, and your exclusive remedies, for a breach of the limited warranty set forth above.

### 6.2.2 Return Authorization

To return a defective product, contact the Thinklogical<sup>®</sup> authorized dealer from whom you purchased the product. Do not return a product directly to Thinklogical without prior authorization from your dealer.

If you have received prior authorization from your dealer and are returning a product directly to Thinklogical:

1. Contact your sales representative, or call Customer Support at **1-800-291-3211** or **1-203-647-8700**.
2. Describe the defect with the product and Customer Support will issue a Return Merchandise Authorization Number (RMA#).
3. Pack the product in its original carton, if possible, and write the RMA number on the box.
4. Return the product to:

**Thinklogical, LLC<sup>®</sup>**  
**Attn: RMA#** [Insert the RMA# issued to you, by Thinklogical, here.]  
**100 Washington Street**  
**Milford, CT 06460 USA**

### **6.2.3. Our Address**

If you have any issues with your product, have product questions or need technical assistance with your *Thinklogical*<sup>®</sup> system, please call us at

**1-800-291-3211 (USA only) or  
1-203-647-8700**

If you'd like to write us, our mailing address is:

**Thinklogical, LLC<sup>®</sup>  
100 Washington Street  
Milford, CT 06460 USA**

## Appendix B: DB9/RJ45 Adapter Pin-outs

Below are the pin-outs for the adapters ADP-000007-R and ADP-000008-R:

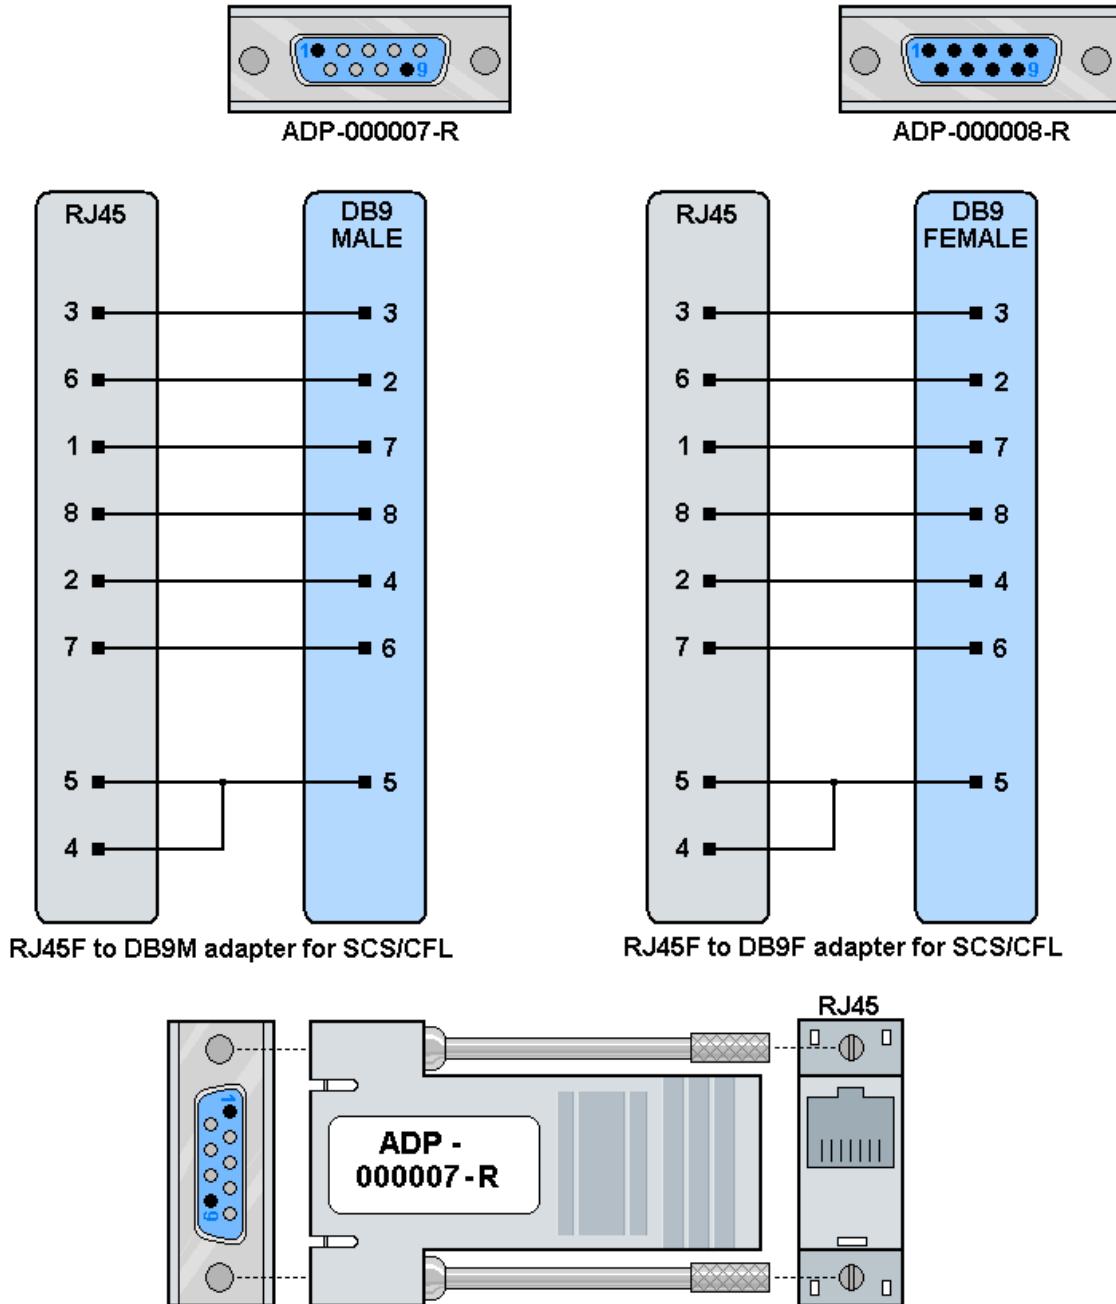

Figure 13: DB9/RJ45 Adapter Pin-outs

## Appendix C: Maximum Distances for Fiber Types

Camera Fiber-Link Extender distance from camera to host computer, tested as a full configuration:

<u>Fiber Type</u>	<u>Distance</u>
OM1	50m
OM2	350m
OM3 Enhanced	1000m
Single-Mode	40km

**Note:** The maximum fiber length is based on one continuous fiber with no junctions, patch panels, etc.

## Appendix D: Camera Fiber-Link Mounting Template

Each Camera Fiber-Link module can be used as a desk top or wall-mounted device. Mounting centers are provided with keyhole slots. *(For vertical mounting, orient the units with fiber and power connectors positioned upwards and MDR-26 and RJ45 connectors positioned downward.)* Users may choose the most appropriate fasteners and anchors to mount each unit according to the requirements of each application.

**Note:** Be sure to leave adequate clearance (3 inch minimum bend radius) for your Fiber Cable.

### Housing Dimensions:

7.0" long x 5.44" wide x 1.19" high  
(177.80 mm x 138.13 mm x 30.16 mm)

The following page contains an actual-size template that is valid for each of the Camera Fiber-Link units available from *Thinklogical*. You can print a 1:1 copy of this page to help you position and mount your device. Vital dimensions are shown in inches and [millimeters].

**Note:** Only the following template (pg. 35) should be used for positioning your *Thinklogical* Camera Fiber-Link device. Other graphic depictions of the devices in this document are not to scale.
