

2A06 Power Supply Module

The 2A06 Power Supply Module supplies operating power to the EOTec 2000 Modem.

The basic modem configuration consists of a Power Supply Module, Electrical Interface Module, and an Optical Interface Module. However, additional Power Supply modules may be added to address Redundant Power Supply applications. A maximum combination of five optical or electrical modules may be powered from one supply, inter-module communications and operating power is achieved through the integrated module interconnections.
