

# **SE-20 / SE-20T**

#### Vibration exciter

# © Applications

- ✓ vibration tests of small-scale devices
- ✓ modal and structural testing
- calibration of vibration sensors according to ISO 16063-21
- ✓ industry, research, education and training

## **Selected Data**

- ✓ high frequency range DC...20 kHz
- $\checkmark$  acceleration up to 600 m/s<sup>2</sup> (61  $g_a$ )
- ✓ low transverse motion typical < 5 %
- ✓ payload, max.: 2 kg (vert.) / 1 kg (horiz.)
- ✓ temperature range, max.: -40 °C...+120 °C

### **Q** Features

- ✓ highly scratch-resistant hard-coated armature made from aluminum
- ✓ first axial resonance frequency > 22 kHz
- ✓ high payload capability for large sensors or geophones
- ✓ easy operation in climate chambers

- ✓ efficient electrodynamic drive
- ✓ optional internal reference accelerometer
- no compressed air supply or zero position controller required
- optional trunnion base for operation at a wide tilt angle range

# **① Options and accessories**

- ✓ suitable power amplifiers (PA 180 DM, PA 500 DM)
- ✓ internal reference accelerometer including BNC cable
- ✓ set for active cooling
- ✓ readout set for the internal temperature sensor
- trunnion base for operation of the vibration exciter at a wide tilt angle range
- ✓ adapter sets

Trunnion base to tilt the SE-20 at any angle between 0°... 90° ▶

<sup>1)</sup> interval mode of operation

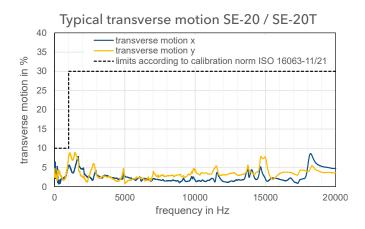

<sup>2)</sup> single peaks up to 15 % / better than ISO 16063-11/21

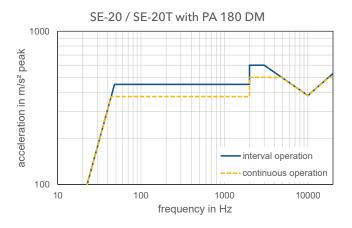

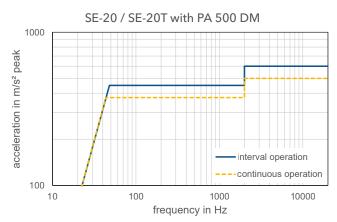

#### ∠ Performance

The diagrams below show the performance of the SE-20 and SE-20T for operation alternating between 10 minutes at full load and 10 minute breaks (blue graph). Performance may vary for different cycles. The yellow graph shows acceleration values that can be safely used during continuous operation.

At 2 kHz, you can see a boost in the maximum acceleration. This is due to a new bearing design which minimizes transverse motion over the whole frequency range and reduces the moving mass above 2 kHz, thereby allowing for increased acceleration at equal force.

# **System integration**

The SE-20 exciters can be easily integrated into a system solution. With our suitable controllers, power amplifiers and a software with extensive functions, we guarantee an efficient workflow for your individual test and calibration tasks.
